Standex No.1 in approvals worldwide

Car owners are accustomed to certain standards of performance, quality and appearance in their vehicles. They also expect these standards to be maintained over time, even after an accident. Car manufacturers are committed to meeting car owner expectations. That's why the majority of manufacturers have officially approved Standox's premium refinishing products for warranty refinish work.

Approvals are based on various criteria established by the car manufacturer – such as product performance, color accuracy, service, support, and distribution, to name a few. Standox is proud to meet the approval requirements of top car manufacturers throughout the world.

The car industry expects vehicle refinishing systems to meet high standards. The coveted approval is therefore only awarded to those with products and services of the highest quality.

Vehicle manufacturers' specifications attach particular importance to the resistance of the painted surface to external influences. The emphasis here is on such properties as scratch resistance, adhesion, corrosion resistance and mechanical strength. Other factors are economy, ease of application and color accuracy. If the vehicle refinishing system satisfies all the specifications of a carmaker, the technical approval is awarded.

Detailed information for each Standox approval is available in the OEM Approvals section of the Standox web site at www.standexna.com.

The approval of a product line, however, is only the first step. Anyone wishing to join the list of "tested suppliers" has to provide flawless service as well. Competent advice, smooth order processing, rapid delivery and technical and management training have to be available today worldwide if the approval is to be forthcoming.

Standex today is the vehicle refinishes supplier with the largest number of approvals worldwide. Over 35 vehicle producers have already acknowledged Standox's capability.

Simply click on the car manufacturer of interest that appear around the OEM approval globe graphic to locate Standox color, technical and approval documentation for that specific manufacturer.
